Per- and Polyfluoroalkyl Substances (PFAS) - Meghan Cassidy (OSRR)

HOT

03/30/2018

In response to a request from NH DES to ORD, Region 1 is working with NHDES and ORD on a project aimed at identifying the possible presence of next generation PFAS compounds in the environment. The goal is to determine if these compounds are present in the environment as a result of ongoing air emissions from two operating manufacturing facilities. These next generation compounds are generally shorter-chain compounds that were developed to replace PFOA. Coordination includes weekly update/planning calls.
